

I Want to go to Agile. Where is it?

Insider view to an agile transformation

Jarkko Kailanto

Background information

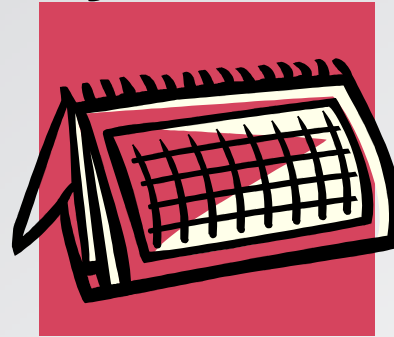

- Netact Network Management System
- Millions of lines of code
- Several development sites
- Tens of Scrum teams involved
- Classic waterfall process

Goals for Agile Transformation

Visibility

Cycle time

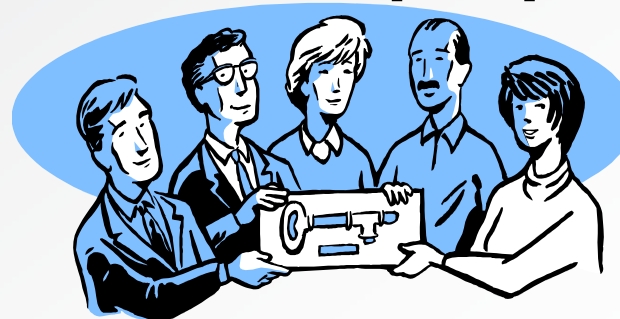

Adaptability

Quality

Motivated people

Progress and problems are extremely visible

Sprints

User Stories

Product Backlogs

~~**Testing progress
follow-up**~~

Visibility

**Awareness of the
progress and
software quality**

Demo practices

**All the problems
painfully visible**

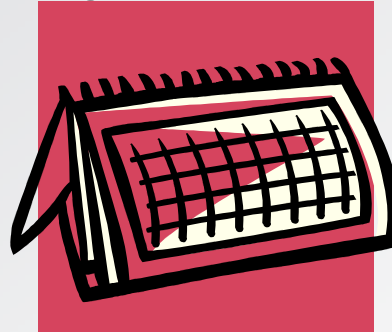

Releasing the Most Important Features the Fastest

**Agile Release Train
(ART)**

Cycle time

**Enterprise backlog
Priorities**

~~**Feature based
teams and
organization**~~

Less waste in planning – changes are welcome

Product management involvement
Time boxing

Adaptability

Retrospectives in use

Misuse of adaptability

Good quality does not come for free

**Continuous Integration
Hardening sprint**

~~**TDD & ATDD not
used everywhere**~~

Quality

**Visibility to the product
integration**

**Fault levels &
correction cycle**

Energized people are the key to change

Not getting things Done

Empowering teams

Motivated people

Fixed teams

Team rooms

Fun at work

How have we succeeded so far?

Visibility

Cycle time

Adaptability

Quality

Motivated people

Where is Agile?

”It’s a journey, not a destination. You never really get there.”

- From Agile Samurai by Jonathan Rasmusson -
